

Anaphylaxis Management at Summit

Date: _____

Dear Parent/Guardian of: _____

Your child is currently on/or requires being on, the medical alert list at Summit. The purpose of the medical alert list is to communicate a camper's life threatening condition and their needs to camp staff to ensure their safety should a medical emergency arise.

The primary responsibility for ensuring a safe camp environment for each child with a life threatening condition is with the parent, student and school staff. The Community Health Nurse acts as a resource.

In order to ensure a safe camp environment we ask the parents and campers to agree to the following responsibilities:

Parent/Guardian

- **Complete the appropriate medical alert information sheet**
- **Provide Summit with doctor instructions and signatures if needed (see attached)**
- **Supply Summit with medication and replace when expired or depleted**
- **Provide your child with a medic alert bracelet**
- **Review medical alert information with Summit staff annually (especially classroom teachers)**
- **Notify Summit staff of any changes in the student's health status during the school year**
- **Participate in educating staff regarding your child's medical alert condition**
- **Ensure that your child has emergency medication with him/her on field trips**

Camper

- **Participate in self-care activities as appropriate for age**
- **Wear a medic alert identification bracelet/necklace**
- **Inform Summit staff and friends of medical alert condition**
- **Avoid allergy triggers or other potentially harmful situations**
- **Inform Summit staff or friends if feeling unwell**

Emergency Action Plan -To be Completed in Consultation with Physician

CHILD'S ANAPHYLAXIS TRIGGERS ARE:

- peanuts nuts milk all dairy eggs shellfish fish
- Food allergies (list): _____
- Insect stings (list): _____
- Medications (list): _____
- Other: _____

CHILD'S ANAPHYLAXIS SYMPTOMS ARE USUALLY:

- Swelling (eyes, lips, face, tongues) Tingling of lips/mouth
- Hives or itchy skin Coughing or choking
- Cold, clammy, sweaty skin Flushed face or body
- Fainting or loss of consciousness Dizziness, confusion
- Stomach cramps/diarrhea/vomiting Change of voice
- Difficulty breathing/swallowing Heart rate changes (fast/slow)
- Other (list) _____

CHILD'S EMERGENCY TREATMENT:

- Anti-histamine (specify brand & dosage): _____
- EpiPen – _____
- Other (list) _____

To be completed by prescribing Physician if emergency medication required at Summit (e.g. EpiPen):

1. Has the child already had an allergic reaction to food? Yes _____ No _____
2. Was emergency treatment required? Yes _____ No _____
3. If the child has never had an allergic reaction, but is at risk, it is recommended parents seek advice from a medical doctor specializing in allergy to discuss a food challenge or allergy testing on the child. If the physician prefers not to test the child, a physician report documenting the potential severity of the condition and treatment protocol is still required if emergency medication is to be kept at Summit.
